Index of Authors

Numerals followed by the letter A refer to Abstracts of Communication read at Meetings for Original Communications of the Nutrition Society

Adam CL, Findlay PA, Morrison MA, Raver N & Miller DW *Ovine model of obesity: evidence for seasonal and dose-dependent changes in hypothalamic sensitivity to leptin*, 165A.

Ade-Omowaye BIO *see* Knorr D, 311.

Afolabi PR, Cawood AL, Jackson JM, Murphy JL, Carroll M, Connett G & Wootton SA *Gastrointestinal handling of vitamin A in cystic fibrosis patients*, 129A.

Aihie Sayer A & Cooper C *Early diet and growth: impact on ageing*, DOI 10.1079/PNS2001138, 79.

Al-Dujaili EAS, Carboni M & deLooy A *The effect of different types of exercise on urinary testosterone levels*, 165A.

Al-Rasasi B, Coad J & Morgan J *Nutrient intake in early pregnancy*, 130A.

Al-Rasasi B *see* Coad J, 51.

Al-Romaihi A, Moloney M & McNamara EP *Nutritional intakes of Qatari women during and after Ramadan*, 74A.

Amet Y, Plee-Gautier E, Dreano Y, Berthou F & Delarue J *Assay and comparison of Δ9 desaturase kinetic parameters in adipose tissue microsomes (rat, human and 3T3-F442A cells)*, 48A.

Ansari ZM *Nutrient fortification of the purée menu at the Royal Bolton hospital*, 33A.

Archer DT & Shirreffs SM *Effect of two methods of hypohydration on rehydration and exercise performance: a comparison with the euhydrated state*, 122A.

Archer ZA, Rayner DV & Mercer JG *Alterations in nutrient partitioning: a consequence of a high-energy (HE) diet*, 166A.

Astrup A, Buemann B, Flint A & Raben A *Low-fat diets and energy balance: how does the evidence stand in 2002?* DOI 10.1079/PNS2002149, 299.

Barker DJP *see* Robinson SM, 537.

Barker P, Morrea S, McNaught CE, MacFie J & Mitchell CJ *A randomised, controlled study of the incidence of phlebitis in patients with short teflon cannulas electively changed at 48 h intervals*, 36A.

Barker P, Walker A, McNaught CE, Mitchell CJ & MacFie J *A three-year audit of stroke patients receiving enteral nutrition*, 30A.

Barton KL, Anderson AS, Woodcock A, Robertson E, McCaffrey P & Porteous LEG *The development and evaluation of a school-based approach to increasing vegetable intake in schoolchildren*, 66A.

Bateson M *Recent advances in our understanding of risk-sensitive foraging preferences*, DOI: 10.1079/PNS2002181, 509.

Baxter JP & Tait JM *Scottish Home Parenteral Nutrition Managed Clinical Network: coordination and standards*, DOI 10.1079/PNS2002165, 359.

Beattie RK, Welch RW, Lee AM, Strain JJ, O'Sullivan K & Campbell GM *Evaluation of the* in vitro *antioxidant activity of wheat milling fractions*, 91A.

Belluzzi A n-*3 Fatty acids for the treatment of inflammatory bowel diseases*, DOI 10.1079/PNS2002171, 391.

Belshaw NJ, Gee JM, Polley A, Watson M, Rhodes M & Johnson IT *A study of CpG island methylation and crypt cytokinetics in human subjects with colorectal cancer*, 43A.

Bento MHL, Acamovic T & Abreu JMF *Effects of quebracho tannins on nutrient utilisation of chickpeas by sheep*, 102A.

Bermúdez FF, Amor Ranedo JJ & Barrio JP *Estimation of food intake through chewing analysis in free-grazing animals*, 67A.

Bernard M-C *see* Vincent S, 427.

Besler HT *The effect of short-term weight loss on the systemic acute markers of inflammation in the overweight Turkish male*, 128A.

Beylot M, Letexier D, Vidon C, Diraison F & Van Loo J *High carbohydrate diet and non-digestible carbohydrates have beneficial effects on endogenous lipid synthesis and plasma lipid levels in humans but do not modify the expression of lipogenic genes in adipose tissue*, 42A.

Bhattacharjee L *see* Tontisirin K, 243.

Binkoski AE *see* Kris-Etherton PM, 287.

Bispham J, Clarke L, Symonds ME & Stephenson T *Postnatal ontogeny of insulin-like growth factor (IGF)-II and the receptors for insulin-like growth factor-I and -II in ovine perirenal adipose tissue*, 138A.

Boulton-Jones JR, Toraman H, Jobling JC & Teahon K *The impact of restructuring a percutaneous gastrostomy service*, 16A.

Boyce A, Hartley H & Thomas JE *Home-managed nutritional supplementation amongst pre-school children with cerebral palsy: effect upon short-term weight gain*, 15A.

Bradbury J, Thomason JM, Jepson NJA, Walls AWG, Allen PF & Moynihan PJ *Use of the theory of planned behaviour to predict intention of complete denture wearers to eat more fruit and vegetables*, 65A.

Brady LM, Lesauvage S, Lovegrove S, Minihane AM, Williams CM & Lovegrove JA *Does the dietary* n-6 *: n-3 polyunsaturated fatty acid ratio modulate the hypolipidaemic effects of fish oil supplementation in British Sikhs*? 123A.

Brady LM, Lesauvage S, Williams CM & Lovegrove JA *Duplicate diet comparison of total fat and fatty acid intake between British Sikhs and Caucasians*, 53A.

Brameld JM & Buttery PJ *Regulation of growth hormone (GH) binding to cultured pig hepatocytes by certain amino acids*, 48A.

Bratley B, Greenwood D, Burley V, Randerson-Moor J, Kukalizch K, Moreton J & Cade J *Genotype and iron intake in British women*, 47A.

Bratley BA, Burley VJ, Greenwood DC, Barrett J & Cade JE *Estimation of haem iron intake from a food frequency questionnaire*, 137A.

Bravo Vergel Y, Greenwood DC & Cade JE *The impact of social class on a healthy diet: analysis from the UK Women's Cohort Study*, 142A.

Breen C, McNamara E & Roche HM *The effect of various types of nutritional education on the nutritional knowledge of senior inter-county Gaelic Athletic Association hurlers*, 80A.

Brooke M & Scott A *An audit of prescribed* versus *received enteral feeds in a critically ill population*, 22A.

Brooke ZM, Rees GA & Doyle W *Red cell folate status of nulliparous women in the first trimester of pregnancy*, 132A.

Brown TJ, Avenell A, Broom J, Smith WCS, Jung R, Campbell MK & Grant AM *Systematic review of exercise and the long-term outcomes of the treatment for obesity*, 154A.

Browning LM, Krebs JD, O'Connell MA, Mishra GD & Jebb SA n-*3 PUFA supplementation improves insulin sensitivity in a group of overweight women with an inflammatory phenotype*, 123A.

Brynes AE, Shrimpton J, O'Neill F, Frost GS & Thompson GR *Dietary fat intake in people with familial hypercholesterolaemia is significantly lower than BMI matched household family members*, 45A.

Buemann B *see* Astrup A, 299.

Bünger L & Cvejanovic V *The effects of cage size and activity on mice selected long-term divergently on fatness*, 164A.

Burden ST, Ward K, Holt A & Makin AJ *An audit of metabolic abnormalities and complications in parenterally fed patients managed by a nutritional support team*, 21A.

Burden ST, Ward K, Parker R, Grant T & Shaffer J *Inequalities in health-care: an investigation into service provision to home-based enterally tube-fed patients in Greater Manchester*, 23A.

Burke SJ, McCarthy SN, O'Dwyer NA, Wallace AJ & Gibney MJ *Cereal intake in Ireland and its potential use for food-based dietary guidelines*, 87A.

Burley VJ, Greenwood DC & Cade JE *Characteristics of women with high and low eating frequency: dietary analysis of the UK Women's Cohort Study*, 140A.

Burt DW & Hocking PM *Mapping quantitative trait loci and identification of genes that control fatness in poultry*, DOI: 10.1079/PNS2002185, 441.

Busserolles J, Zimowska W, Rock E, Rayssiguier Y & Mazur A *Rats fed a high-sucrose diet have altered heart antioxidant enzyme activity and gene expression*, 52A.

Cade JE, Burley VJ & Greenwood DC *Association of dietary variety with nutrient intake and body mass in women: results from the UK Women's Cohort Study*, 151A.

Cade JE, Frear L, Lawson K, Greenwood D, Thomas JD, Sahota P & Rudolf M *Development of a dietary assessment tool for children (the PEARS project), for the Department of Health*, 142A.

Calder PC *Dietary modification of inflammation with lipids*, DOI 10.1079/PNS2002166, 345.

Calder PC *see* Howell WM, 447.

Index of Authors also available at www.cabi-publishing.org/jnlindices

Index of Subjects

Acid-base balance
The role of the skeleton in acid–base homeostasis
61, 151, 2002, DOI: 10.1079/PNS2002159

Adequacy of rations
Meeting the challenges of micronutrient deficiencies in emergency-affected populations
61, 251, 2002, DOI: 10.1079/PNS2002151

Adolescence
Developmental issues in attitudes to food and diet
61, 259, 2002, DOI: 10.1079/PNS2002152

Ageing
Early diet and growth: impact on ageing
61, 79, 2002, DOI: 10.1079/PNS2001138

A role for the peroxisome proliferator-activated receptor α in T-cell physiology and ageing immunobiology
61, 363, 2002, DOI: 10.1079/PNS2002173

Agriculture
Food policies: a threat to health?
61, 579, 2002, DOI: 10.1079/PNS2002192

Agricultural change
The production of food: from quantity to quality
61, 273, 2002, DOI: 10.1079/PNS2002156

Allergen avoidance
Food allergen avoidance: risk assessment for life
61, 39, 2002, DOI: 10.1079/PNS2001128

Allergen exposure
Factors affecting the development of food allergy
61, 435, 2002, DOI: 10.1079/PNS2002184

Alzheimer's disease
Antioxidant strategies for Alzheimer's disease
61, 191, 2002, DOI: 10.1079/PNS2002146

Amino acid infusion
Peri-operative amino acid administration and the metabolic response to surgery
61, 337, 2002, DOI: 10.1079/PNS2002175

Anaesthesia
Peri-operative amino acid administration and the metabolic response to surgery
61, 337, 2002, DOI: 10.1079/PNS2002175

Anaphylaxis
Food allergen avoidance: risk assessment for life
61, 39, 2002, DOI: 10.1079/PNS2001128

Animal models
Dietary essential fatty acids and brain function: a developmental prospective on mechanisms
61, 61, 2002, DOI: 10.1079/PNS2001130

Anti-inflammatory
Effects of micronutrient supplements on u.v.-induced skin damage **61**, 187, 2002, DOI: 10.1079/PNS2002158

Antioxidants
Regulation of cell signalling by vitamin E
61, 415, 2002, DOI: 10.1079/PNS2002183

Antioxidant activities
Evidence for consistent patterns between flavonoid structures and cellular activities
61, 97, 2002, DOI: 10.1079/PNS2001133

Antioxidants
Nutrition interventions in aging and age-associated disease
61, 165, 2002, DOI: 10.1079/PNS2002144

Effects of micronutrient supplements on u.v.-induced skin damage **61**, 187, 2002, DOI: 10.1079/PNS2002158

Antioxidant strategies for Alzheimer's disease
61, 191, 2002, DOI: 10.1079/PNS2002146

Salivary antioxidants and periodontal disease status
61, 137, 2002, DOI: 10.1079/PNS2001141

Anti-proliferative activities
Evidence for consistent patterns between flavonoid structures and cellular activities
61, 97, 2002, DOI: 10.1079/PNS2001133

Appetite
The physiological–psychological dichotomy in the study of food intake **61**, 497, 2002, DOI: 10.1079/PNS2002187

Arachidonic acid
Dietary essential fatty acids and brain function: a developmental prospective on mechanisms
61, 61, 2002, DOI: 10.1079/PNS2001130

Athlete's diet
The athlete's diet: nutritional goals and dietary strategies
61, 87, 2002, DOI: 10.1079/PNS2001132

Attitudes
Resistance to changes in diet
61, 267, 2002, DOI: 10.1079/PNS2002147

Body fatness
Does body mass play a role in the regulation of food intake?
61, 473, 2002, DOI: 10.1079/PNS2002194

Body-weight regulation
Low-fat diets and energy balance: how does the evidence stand in 2002? **61**, 299, 2002, DOI: 10.1079/PNS2002149

Bone metabolism
The role of the skeleton in acid–base homeostasis
61, 151, 2002, DOI: 10.1079/PNS2002159

Bone mineral density
Strategies for skeletal health in the elderly
61, 173, 2002, DOI: 10.1079/PNS2002160

Brain development
Dietary essential fatty acids and brain function: a developmental prospective on mechanisms
61, 61, 2002, DOI: 10.1079/PNS2001130

Cancer
Nutritional epidemiology of cancer: accomplishments and prospects **61**, 217, 2002, DOI: 10.1079/PNS2002145

Gene polymorphisms, inflammatory diseases and cancer **61**, 447, 2002, DOI: 10.1079/PNS2002186

Cancer epidemiology
Nutritional epidemiology of cancer: accomplishments and prospects **61**, 217, 2002, DOI: 10.1079/PNS2002145

Carbohydrates
Modulation of post-operative insulin resistance by pre-operative carbohydrate loading **61**, 329, 2002, DOI: 10.1079/PNS2002168

Carbohydrate intake
Effect of social variation on the Irish diet **61**, 527, 2002, DOI: 10.1079/PNS2002191

Cardiovascular disease
Dietary fat: assessing the evidence in support of a moderate-fat diet; the benchmark based on lipoprotein metabolism **61**, 287, 2002, DOI: 10.1079/PNS2002157

Regulation of cell signalling by vitamin E **61**, 415, 2002, DOI: 10.1079/PNS2002183

Cardiovascular risk
Genetic polymorphisms and lipoprotein responses to diets **61**, 427, 2002, DOI: 10.1079/PNS2002177

Cartilage metabolism
Effects of *n*-3 fatty acids on cartilage metabolism **61**, 381, 2002, DOI: 10.1079/PNS2002174

Cell signalling
Regulation of cell signalling by vitamin E **61**, 415, 2002, DOI: 10.1079/PNS2002183

Chicken
Mapping quantitative trait loci and identification of genes that control fatness in poultry **61**, 441, 2002, DOI: 10.1079/PNS2002185

Childhood growth
Coronary heart disease: a disorder of growth **61**, 537, 2002, DOI: 10.1079/PNS2002189

Child-feeding practices
Developmental issues in attitudes to food and diet **61**, 259, 2002, DOI: 10.1079/PNS2002152

Chondrocytes
Effects of *n*-3 fatty acids on cartilage metabolism **61**, 381, 2002, DOI: 10.1079/PNS2002174

Chronic illness
Understanding chronic malnutrition in childhood and old age: role of energy balance research **61**, 321, 2002, DOI: 10.1079/PNS2002164

Clinical standards
Scottish Home Parenteral Nutrition Managed Clinical Network: coordination and standards **61**, 359, 2002, DOI: 10.1079/PNS2002165

Common diseases
Gene–environment interaction: a central concept in multi-factorial diseases **61**, 457, 2002, DOI: 10.1079/PNS2002178

Consumer preferences
The production of food: from quantity to quality 61, 273, 2002, DOI: 10.1079/PNS2002156

Copper
Is there a potential therapeutic value of copper and zinc for osteoporosis? **61**, 181, 2002, DOI: 10.1079/PNS2002154

Coronary heart disease
Coronary heart disease: a disorder of growth **61**, 537, 2002, DOI: 10.1079/PNS2002189

Cost–benefit
The evolution of the control of food intake **61**, 465, 2002, DOI: 10.1079/PNS2002179

Critical illness
Understanding chronic malnutrition in childhood and old age: role of energy balance research **61**, 321, 2002, DOI: 10.1079/PNS2002164

Crohn's disease
Fine and ultrafine particles of the diet: influence on the mucosal immune response and association with Crohn's disease **61**, 123, 2002, DOI: 10.1079/PNS2001134

Culture
Mad cows, mad corn and mad communities: the role of socio-cultural factors in the perceived risk of genetically-modified food **61**, 31, 2002, DOI: 10.1079/PNS2001127

Cytokine genes
Gene polymorphisms, inflammatory diseases and cancer **61**, 447, 2002, DOI: 10.1079/PNS2002186

Cytokines
Effects of micronutrient supplements on u.v.-induced skin damage **61**, 187, 2002, DOI: 10.1079/PNS2002158

Dietary modification of inflammation with lipids **61**, 345, 2002, DOI: 10.1079/PNS2002166

DAFNE
Disparities in food habits across Europe **61**, 553, 2002, DOI: 10.1079/PNS2002188

Degenerative diseases
Effects of *n*-3 fatty acids on cartilage metabolism 61, 381, 2002, DOI: 10.1079/PNS2002174

Developing countries
Food-based strategies to meet the challenges of micronutrient malnutrition in the developing world **61**, 243, 2002, DOI: 10.1079/PNS2002155

Diet
Maternal carbohydrate intake and pregnancy outcome **61**, 45, 2002, DOI: 10.1079/PNS2001129

Strategies for skeletal health in the elderly **61**, 173, 2002, DOI: 10.1079/PNS2002160

Post-genomic opportunities for understanding nutrition: the nutritionist's perspective **61**, 401, 2002, DOI: 10.1079/PNS2002182

Disparities in food habits across Europe **61**, 553, 2002, DOI: 10.1079/PNS2002188

Healthy diet and lifestyle clustering and glucose intolerance **61**, 543, 2002, DOI: 10.1079/PNS2002196

Food policies: a threat to health? **61**, 579, 2002, DOI: 10.1079/PNS2002192

Dietary adequacy
Food budget standards and dietary adequacy in low-income families **61**, 569, 2002, DOI: 10.1079/PNS2002193

Dietary carbohydrate
Changes in fat synthesis influenced by dietary macronutrient content **61**, 281, 2002, DOI: 10.1079/PNS2002148

Dietary change
Resistance to changes in diet **61**, 267, 2002, DOI: 10.1079/PNS2002147

Dietary compliance
An obesity clinic model **61**, 9, 2002, DOI: 10.1079/PNS2001131

Dietary diversification
Food-based strategies to meet the challenges of micronutrient malnutrition in the developing world **61**, 243, 2002, DOI: 10.1079/PNS2002155

Dietary microparticles
Fine and ultrafine particles of the diet: influence on the mucosal immune response and association with Crohn's disease **61**, 123, 2002, DOI: 10.1079/PNS2001134

Dietary potassium
The role of the skeleton in acid–base homeostasis **61**, 151, 2002, DOI: 10.1079/PNS2002159

Dietary strategies
The athlete's diet: nutritional goals and dietary strategies **61**, 87, 2002, DOI: 10.1079/PNS2001132

Dietary supplements
Antioxidant strategies for Alzheimer's disease **61**, 191, 2002, DOI: 10.1079/PNS2002146

Dieting
Developmental issues in attitudes to food and diet **61**, 259, 2002, DOI: 10.1079/PNS2002152

1,25-Dihydroxycholecalciferol
1,25-Dihydroxycholecalciferol: endocrinology meets the immune system **61**, 375, 2002, DOI: 10.1079/PNS2002170

DNA methylation
Manipulating the sulfur amino acid content of the early diet and its implications for long-term health **61**, 71, 2002, DOI: 10.1079/PNS2001137

Docosahexaenoic acid
Dietary essential fatty acids and brain function: a developmental prospective on mechanisms **61**, 61, 2002, DOI: 10.1079/PNS2001130

n-3 Fatty acids for the treatment of inflammatory bowel diseases **61**, 391, 2002, DOI: 10.1079/PNS2002171

Doubly-labelled-water method
Understanding chronic malnutrition in childhood and old age: role of energy balance research **61**, 321, 2002, DOI: 10.1079/PNS2002164

Economic forces
The production of food: from quantity to quality **61**, 273, 2002, DOI: 10.1079/PNS2002156

Editorial
PNS – still sparkling after 60 years **61**, 1, 2002, DOI: 10.1079/PNS2001143

Eicosanoids
Dietary modification of inflammation with lipids **61**, 345, 2002, DOI: 10.1079/PNS2002166

Eicosapentaenoic acid
n-3 Fatty acids for the treatment of inflammatory bowel diseases **61**, 391, 2002, DOI: 10.1079/PNS2002171

Elderly
Strategies for skeletal health in the elderly **61**, 173, 2002, DOI: 10.1079/PNS2002160

Elective surgery
Modulation of post-operative insulin resistance by pre-operative carbohydrate loading **61**, 329, 2002, DOI: 10.1079/PNS2002168

Emergencies
Meeting the challenges of micronutrient deficiencies in emergency-affected populations **61**, 251, 2002, DOI: 10.1079/PNS2002151

Endocrine disruption
Steroid hormone receptors and dietary ligands: a selected review **61**, 105, 2002, DOI: 10.1079/PNS2001140

Energy
Human eating behaviour in an evolutionary ecological context **61**, 517, 2002, DOI: 10.1079/PNS2002180

Energy-budget rule
Recent advances in our understanding of risk-sensitive foraging preferences **61**, 509, 2002, DOI: 10.1079/PNS2002181

Energy expenditure
Understanding chronic malnutrition in childhood and old age: role of energy balance research **61**, 321, 2002, DOI: 10.1079/PNS2002164

Energy homeostasis
Does body mass play a role in the regulation of food intake? **61**, 473, 2002, DOI: 10.1079/PNS2002194

Energy requirements
Understanding chronic malnutrition in childhood and old age: role of energy balance research **61**, 321, 2002, DOI: 10.1079/PNS2002164

Enzyme inhibitor activities
Evidence for consistent patterns between flavonoid structures and cellular activities **61**, 97, 2002, DOI: 10.1079/PNS2001133

Essential fatty acids
Dietary essential fatty acids and brain function: a developmental prospective on mechanisms **61**, 61, 2002, DOI: 10.1079/PNS2001130

Ethnic minority groups
Nutrition intervention in ethnic minority groups **61**, 559, 2002, DOI: 10.1079/PNS2002195

European household budget surveys
Disparities in food habits across Europe **61**, 553, 2002, DOI: 10.1079/PNS2002188

Exposure assessment
The use of food consumption data in assessments of exposure to food chemicals including the application of probabilistic modelling **61**, 11, 2002, DOI: 10.1079/PNS2001125

Fat intake
Effect of social variation on the Irish diet **61**, 527, 2002, DOI: 10.1079/PNS2002191

Fatness
Mapping quantitative trait loci and identification of genes that control fatness in poultry
61, 441, 2002, DOI: 10.1079/PNS2002185

Fatty acids
Dietary modification of inflammation with lipids
61, 345, 2002, DOI: 10.1079/PNS2002166

Effects of fatty acids on gene expression: role of peroxisome proliferator-activated receptor α, liver X receptor α and sterol regulatory element-binding protein-1c
61, 371, 2002, DOI: 10.1079/PNS2002169

Feeding
Human eating behaviour in an evolutionary ecological context
61, 517, 2002, DOI: 10.1079/PNS2002180

Feeding behaviour
Recent advances in the physiology of eating
61, 489, 2002, DOI: 10.1079/PNS2002190

Fetal development
Nutrient insult in early pregnancy
61, 51, 2002, DOI: 10.1079/PNS2001136

Fetal growth
Coronary heart disease: a disorder of growth
61, 537, 2002, DOI: 10.1079/PNS2002189

Fetal programming
Manipulating the sulfur amino acid content of the early diet and its implications for long-term health
61, 71, 2002, DOI: 10.1079/PNS2001137

Coronary heart disease: a disorder of growth
61, 537, 2002, DOI: 10.1079/PNS2002189

Feto-placental growth
Maternal carbohydrate intake and pregnancy outcome
61, 45, 2002, DOI: 10.1079/PNS2001129

Fish oil
Dietary modification of inflammation with lipids
61, 345, 2002, DOI: 10.1079/PNS2002166

n-3 Fatty acids for the treatment of inflammatory bowel diseases **61**, 391, 2002, DOI: 10.1079/PNS2002171

Fitness
The evolution of the control of food intake
61, 465, 2002, DOI: 10.1079/PNS2002179

Flavonoids
Evidence for consistent patterns between flavonoid structures and cellular activities
61, 97, 2002, DOI: 10.1079/PNS2001133

Food advertising
Developmental issues in attitudes to food and diet
61, 259, 2002, DOI: 10.1079/PNS2002152

Food allergy
Food allergen avoidance: risk assessment for life
61, 39, 2002, DOI: 10.1079/PNS2001128

Factors affecting the development of food allergy
61, 435, 2002, DOI: 10.1079/PNS2002184

Food-based strategies
Food-based strategies to meet the challenges of micronutrient malnutrition in the developing world
61, 243, 2002, DOI: 10.1079/PNS2002155

Food budget standards
Food budget standards and dietary adequacy in low-income families **61**, 569, 2002, DOI: 10.1079/PNS2002193

Food chemicals
The use of food consumption data in assessments of exposure to food chemicals including the application of probabilistic modelling **61**, 11, 2002, DOI: 10.1079/PNS2001125

Food choice
Developmental issues in attitudes to food and diet
61, 259, 2002, DOI: 10.1079/PNS2002152

Food consumption data
The use of food consumption data in assessments of exposure to food chemicals including the application of probabilistic modelling **61**, 11, 2002, DOI: 10.1079/PNS2001125

Food demand
The production of food: from quantity to quality
61, 273, 2002, DOI: 10.1079/PNS2002156

Food expenditure
Food budget standards and dietary adequacy in low-income families **61**, 569, 2002, DOI: 10.1079/PNS2002193

Food fortification
Nutritional losses and gains during processing: future problems and issues **61**, 145, 2002, DOI: 10.1079/PNS2001142

Food intake
The evolution of the control of food intake
61, 465, 2002, DOI: 10.1079/PNS2002179

Food policy
Food policies: a threat to health?
61, 579, 2002, DOI: 10.1079/PNS2002192

Food preference
The physiological–psychological dichotomy in the study of food intake **61**, 497, 2002, DOI: 10.1079/PNS2002187

Food preservation
Nutritional improvement of plant foods by non-thermal processing **61**, 311, 2002, DOI: 10.1079/PNS2002162

Food processing
Nutritional losses and gains during processing: future problems and issues **61**, 145, 2002, DOI: 10.1079/PNS2001142

Food production
The production of food: from quantity to quality
61, 273, 2002, DOI: 10.1079/PNS2002156

Food safety evaluation
Genetically modified foods, science, consumers and the media
61, 25, 2002, DOI: 10.1079/PNS2001135

Fortification
Fortification strategies to meet micronutrient needs: successes and failures **61**, 231, 2002, DOI: 10.1079/PNS2002150

Fracture
Strategies for skeletal health in the elderly
61, 173, 2002, DOI: 10.1079/PNS2002160

Fruit and vegetable consumption
The role of the skeleton in acid–base homeostasis
61, 151, 2002, DOI: 10.1079/PNS2002159

Functional genomics
Mapping quantitative trait loci and identification of genes that control fatness in poultry
61, 441, 2002, DOI: 10.1079/PNS2002185

Gene–environment interaction
Gene–environment interaction: a central concept in multifactorial diseases
61, 457, 2002, DOI: 10.1079/PNS2002178

Gene expression
Regulation of cell signalling by vitamin E
61, 415, 2002, DOI: 10.1079/PNS2002183

Gene polymorphisms
Genetic polymorphisms and lipoprotein responses to diets
61, 427, 2002, DOI: 10.1079/PNS2002177

Gene polymorphisms, inflammatory diseases and cancer
61, 447, 2002, DOI: 10.1079/PNS2002186

Genetically-modified food
Mad cows, mad corn and mad communities: the role of socio-cultural factors in the perceived risk of genetically-modified food **61**, 31, 2002, DOI: 10.1079/PNS2001127

Genetic modification
Genetically modified foods, science, consumers and the media
61, 25, 2002, DOI: 10.1079/PNS2001135

Genetics
Post-genomic opportunities for understanding nutrition: the nutritionist's perspective
61, 401, 2002, DOI: 10.1079/PNS2002182

Genomics
Mapping quantitative trait loci and identification of genes that control fatness in poultry
61, 441, 2002, DOI: 10.1079/PNS2002185

Glucose intolerance
Healthy diet and lifestyle clustering and glucose intolerance
61, 543, 2002, DOI: 10.1079/PNS2002196

Glycaemic index
Maternal carbohydrate intake and pregnancy outcome
61, 45, 2002, DOI: 10.1079/PNS2001129

Growth
Early diet and growth: impact on ageing
61, 79, 2002, DOI: 10.1079/PNS2001138

Health behaviour
Nutrition intervention in ethnic minority groups
61, 559, 2002, DOI: 10.1079/PNS2002195

Health benefits
Dietary fat: assessing the evidence in support of a moderate-fat diet; the benchmark based on lipoprotein metabolism
61, 287, 2002, DOI: 10.1079/PNS2002157

High-pressure processing
Nutritional improvement of plant foods by non-thermal processing **61**, 311, 2002, DOI: 10.1079/PNS2002162

HIV
The paradox of improved antiretroviral therapy in HIV: potential for nutritional modulation?
61, 131, 2002, DOI: 10.1079/PNS2001139

Home parenteral nutrition
Scottish Home Parenteral Nutrition Managed Clinical Network: coordination and standards
61, 359, 2002, DOI: 10.1079/PNS2002165

Hominid diet
Human eating behaviour in an evolutionary ecological context
61, 517, 2002, DOI: 10.1079/PNS2002180

Homocysteine
Manipulating the sulfur amino acid content of the early diet and its implications for long-term health
61, 71, 2002, DOI: 10.1079/PNS2001137

Human evolution
Human eating behaviour in an evolutionary ecological context
61, 517, 2002, DOI: 10.1079/PNS2002180

Human feeding study
Changes in fat synthesis influenced by dietary macronutrient content **61**, 281, 2002, DOI: 10.1079/PNS2002148

Human health
The argument for increasing selenium intake
61, 203, 2002, DOI: 10.1079/PNS2002153

Human intervention study
Genetic polymorphisms and lipoprotein responses to diets
61, 427, 2002, DOI: 10.1079/PNS2002177

Human leucocyte antigen genes
Gene polymorphisms, inflammatory diseases and cancer
61, 447, 2002, DOI: 10.1079/PNS2002186

Human oestrogen receptors
Steroid hormone receptors and dietary ligands: a selected review **61**, 105, 2002, DOI: 10.1079/PNS2001140

Human studies
Post-genomic opportunities for understanding nutrition: the nutritionist's perspective
61, 401, 2002, DOI: 10.1079/PNS2002182

Hypertension
Manipulating the sulfur amino acid content of the early diet and its implications for long-term health
61, 71, 2002, DOI: 10.1079/PNS2001137

Hypothermia
Peri-operative amino acid administration and the metabolic response to surgery
61, 337, 2002, DOI: 10.1079/PNS2002175

Immunobiology
A role for the peroxisome proliferator-activated receptor α in T-cell physiology and ageing immunobiology
61, 363, 2002, DOI: 10.1079/PNS2002173

Inflammation
Dietary modification of inflammation with lipids
61, 345, 2002, DOI: 10.1079/PNS2002166

Vitamin A as an anti-inflammatory agent
61, 397, 2002, DOI: 10.1079/PNS2002172

Inflammatory bowel disease
n-3 Fatty acids for the treatment of inflammatory bowel diseases **61**, 391, 2002, DOI: 10.1079/PNS2002171

Inflammatory diseases
Gene polymorphisms, inflammatory diseases and cancer
61, 447, 2002, DOI: 10.1079/PNS2002186

Insulin resistance
Modulation of post-operative insulin resistance by pre-operative carbohydrate loading
61, 329, 2002, DOI: 10.1079/PNS2002168

Insulin-like growth factor
Nutrient insult in early pregnancy
61, 51, 2002, DOI: 10.1079/PNS2001136

Intervention strategies
Nutrition intervention in ethnic minority groups
61, 559, 2002, DOI: 10.1079/PNS2002195

Iodine-deficiency disorders
Fortification strategies to meet micronutrient needs: successes and failures
61, 231, 2002, DOI: 10.1079/PNS2002150

Ireland
Overweight, obesity and physical activity levels in Irish adults: evidence from the North/South Ireland Food Consumption Survey **61**, 3, 2002, DOI: 10.1079/PNS2001121

Iron and folate supplements
Can supplements help meet the micronutrient needs of the developing world?
61, 223, 2002, DOI: 10.1079/PNS2002163

Iron-deficiency anaemia
Fortification strategies to meet micronutrient needs: successes and failures
61, 231, 2002, DOI: 10.1079/PNS2002150

Leptin
Does body mass play a role in the regulation of food intake?
61, 473, 2002, DOI: 10.1079/PNS2002194

Lifestyle
Healthy diet and lifestyle clustering and glucose intolerance
61, 543, 2002, DOI: 10.1079/PNS2002196

Ligand-receptor interaction
Steroid hormone receptors and dietary ligands: a selected review **61**, 105, 2002, DOI: 10.1079/PNS2001140

Linear programming
The evolution of the control of food intake
61, 465, 2002, DOI: 10.1079/PNS2002179

Lipids
The paradox of improved antiretroviral therapy in HIV: potential for nutritional modulation?
61, 131, 2002, DOI: 10.1079/PNS2001139

Lipodystrophy
The paradox of improved antiretroviral therapy in HIV: potential for nutritional modulation?
61, 131, 2002, DOI: 10.1079/PNS2001139

Lipogenesis
Changes in fat synthesis influenced by dietary macronutrient content **61**, 281, 2002, DOI: 10.1079/PNS2002148

Lipoprotein metabolism
Dietary fat: assessing the evidence in support of a moderate-fat diet; the benchmark based on lipoprotein metabolism
61, 287, 2002, DOI: 10.1079/PNS2002157

Lipostat
Does body mass play a role in the regulation of food intake?
61, 473, 2002, DOI: 10.1079/PNS2002194

Low-fat diets
Low-fat diets and energy balance: how does the evidence stand in 2002? **61**, 299, 2002, DOI: 10.1079/PNS2002149

Low-income families
Food budget standards and dietary adequacy in low-income families **61**, 569, 2002, DOI: 10.1079/PNS2002193

Man
Recent advances in the physiology of eating
61, 489, 2002, DOI: 10.1079/PNS2002190

Maternal nutrition
Nutrient insult in early pregnancy
61, 51, 2002, DOI: 10.1079/PNS2001136

Meal size
The physiological–psychological dichotomy in the study of food intake **61**, 497, 2002, DOI: 10.1079/PNS2002187

Mediterranean diet
Genetic polymorphisms and lipoprotein responses to diets
61, 427, 2002, DOI: 10.1079/PNS2002177

Metabolic syndrome
Manipulating the sulfur amino acid content of the early diet and its implications for long-term health
61, 71, 2002, DOI: 10.1079/PNS2001137

Metabolism
Maternal carbohydrate intake and pregnancy outcome
61, 45, 2002, DOI: 10.1079/PNS2001129

The paradox of improved antiretroviral therapy in HIV: NSpotential for nutritional modulation?
61, 131, 2002, DOI: 10.1079/PNS2001139

Peri-operative amino acid administration and the metabolic response to surgery
61, 337, 2002, DOI: 10.1079/PNS2002175

Metallothionein
Intracellular trafficking of micronutrients: from gene regulation to nutrient requirements
61, 405, 2002, DOI: 10.1079/PNS2002176

Methodology
The physiological–psychological dichotomy in the study of food intake **61**, 497, 2002, DOI: 10.1079/PNS2002187

Micronutrient deficiencies
Meeting the challenges of micronutrient deficiencies in emergency-affected populations
61, 251, 2002, DOI: 10.1079/PNS2002151

Micronutrient malnutrition
Fortification strategies to meet micronutrient needs: successes and failures **61**, 231, 2002, DOI: 10.1079/PNS2002150

Food-based strategies to meet the challenges of micronutrient malnutrition in the developing world
61, 243, 2002, DOI: 10.1079/PNS2002155

Micronutrient supplementation
Can supplements help meet the micronutrient needs of the developing world?
61, 223, 2002, DOI: 10.1079/PNS2002163

Moderate-fat diet
Dietary fat: assessing the evidence in support of a moderate-fat diet; the benchmark based on lipoprotein metabolism
61, 287, 2002, DOI: 10.1079/PNS2002157

Modifiable risk factors
Nutrition intervention in ethnic minority groups
61, 559, 2002, DOI: 10.1079/PNS2002195

mRNA expression
Effects of fatty acids on gene expression: role of peroxisome proliferator-activated receptor α, liver X receptor α and sterol regulatory element-binding protein-1c
61, 371, 2002, DOI: 10.1079/PNS2002169

Musculo-skeletal ageing
Early diet and growth: impact on ageing
61, 79, 2002, DOI: 10.1079/PNS2001138

Nausea and vomiting in pregnancy
Nutrient insult in early pregnancy
61, 51, 2002, DOI: 10.1079/PNS2001136

***n*-3 Polyunsaturated fatty acids**
Effects of *n*-3 fatty acids on cartilage metabolism
61, 381, 2002, DOI: 10.1079/PNS2002174

NOD mice
1,25-Dihydroxycholecalciferol: endocrinology meets the immune system
61, 375, 2002, DOI: 10.1079/PNS2002170

Non-thermal food processing
Nutritional improvement of plant foods by non-thermal processing **61**, 311, 2002, DOI: 10.1079/PNS2002162

Nuclear hormone receptors
Effects of fatty acids on gene expression: role of peroxisome proliferator-activated receptor α, liver X receptor α and sterol regulatory element-binding protein-1c
61, 371, 2002, DOI: 10.1079/PNS2002169

Nutrient deprivation
Nutrient insult in early pregnancy
61, 51, 2002, DOI: 10.1079/PNS2001136

Nutrient–gene interactions
Intracellular trafficking of micronutrients: from gene regulation to nutrient requirements
61, 405, 2002, DOI: 10.1079/PNS2002176

Nutritional epidemiology
Nutritional epidemiology of cancer: accomplishments and prospects **61**, 217, 2002, DOI: 10.1079/PNS2002145

Nutritional goals
The athlete's diet: nutritional goals and dietary strategies
61, 87, 2002, DOI: 10.1079/PNS2001132

Nutritional quality
Nutritional improvement of plant foods by non-thermal processing **61**, 311, 2002, DOI: 10.1079/PNS2002162

Nutritional qualities
Nutritional quality of organic food: shades of grey or shades of green? **61**, 19, 2002, DOI: 10.1079/PNS2001126

Nutritional losses and gains during processing: future problems and issues **61**, 145, 2002, DOI: 10.1079/PNS2001142

Nutritional support
Understanding chronic malnutrition in childhood and old age: role of energy balance research
61, 321, 2002, DOI: 10.1079/PNS2002164

Obesity
Overweight, obesity and physical activity levels in Irish adults: evidence from the North/South Ireland Food Consumption Survey **61**, 3, 2002, DOI: 10.1079/PNS2001121

An obesity clinic model
61, 9, 2002, DOI: 10.1079/PNS2001131

Low-fat diets and energy balance: how does the evidence stand in 2002? **61**, 299, 2002, DOI: 10.1079/PNS2002149

Optimistic bias
Resistance to changes in diet
61, 267, 2002, DOI: 10.1079/PNS2002147

Oral tolerance
Factors affecting the development of food allergy
61, 435, 2002, DOI: 10.1079/PNS2002184

Organic foods
Nutritional quality of organic food: shades of grey or shades of green? **61**, 19, 2002, DOI: 10.1079/PNS2001126

Osteoporosis
Strategies for skeletal health in the elderly
61, 173, 2002, DOI: 10.1079/PNS2002160

Is there a potential therapeutic value of copper and zinc for osteoporosis? **61**, 181, 2002, DOI: 10.1079/PNS2002154

Overnight fasting
Modulation of post-operative insulin resistance by pre-operative carbohydrate loading
61, 329, 2002, DOI: 10.1079/PNS2002168

Oxidative stress
Nutrition interventions in aging and age-associated disease
61, 165, 2002, DOI: 10.1079/PNS2002144

Antioxidant strategies for Alzheimer's disease
61, 191, 2002, DOI: 10.1079/PNS2002146

Periodontitis
Salivary antioxidants and periodontal disease status
61, 137, 2002, DOI: 10.1079/PNS2001141

Peroxisome proliferator-activated receptor α
A role for the peroxisome proliferator-activated receptor α in T-cell physiology and ageing immunobiology
61, 363, 2002, DOI: 10.1079/PNS2002173

Physical activity
Overweight, obesity and physical activity levels in Irish adults: evidence from the North/South Ireland Food Consumption Survey **61**, 3, 2002, DOI: 10.1079/PNS2001121

Physiology of eating
Recent advances in the physiology of eating
61, 489, 2002, DOI: 10.1079/PNS2002190

Pleasure
The physiological–psychological dichotomy in the study of food intake **61**, 497, 2002, DOI: 10.1079/PNS2002187

Polymorphism
Intracellular trafficking of micronutrients: from gene regulation to nutrient requirements
61, 405, 2002, DOI: 10.1079/PNS2002176

Polyunsaturated fatty acids
Effects of micronutrient supplements on u.v.-induced skin damage **61**, 187, 2002, DOI: 10.1079/PNS2002158

n-3 Fatty acids for the treatment of inflammatory bowel diseases **61**, 391, 2002, DOI: 10.1079/PNS2002171

Pregnancy
Maternal carbohydrate intake and pregnancy outcome
61, 45, 2002, DOI: 10.1079/PNS2001129

Prenatal diet restriction
Early diet and growth: impact on ageing
61, 79, 2002, DOI: 10.1079/PNS2001138

Probabilistic model
The use of food consumption data in assessments of exposure to food chemicals including the application of probabilistic modelling
61, 11, 2002, DOI: 10.1079/PNS2001125

Programming
Early diet and growth: impact on ageing
61, 79, 2002, DOI: 10.1079/PNS2001138

Psychology
Mad cows, mad corn and mad communities: the role of socio-cultural factors in the perceived risk of genetically-modified food **61**, 31, 2002, DOI: 10.1079/PNS2001127

Pulsed electric fields
Nutritional improvement of plant foods by non-thermal processing **61**, 311, 2002, DOI: 10.1079/PNS2002162

Quantitative trait loci
Mapping quantitative trait loci and identification of genes that control fatness in poultry
61, 441, 2002, DOI: 10.1079/PNS2002185

Reactive oxygen species
Salivary antioxidants and periodontal disease status
61, 137, 2002, DOI: 10.1079/PNS2001141

Refugees
Meeting the challenges of micronutrient deficiencies in emergency-affected populations
61, 251, 2002, DOI: 10.1079/PNS2002151

Risk assessment
Food allergen avoidance: risk assessment for life
61, 39, 2002, DOI: 10.1079/PNS2001128

Risk-averse
Recent advances in our understanding of risk-sensitive foraging preferences **61**, 509, 2002, DOI: 10.1079/PNS2002181

Risk perception
Mad cows, mad corn and mad communities: the role of socio-cultural factors in the perceived risk of genetically-modified food **61**, 31, 2002, DOI: 10.1079/PNS2001127

Risk-prone
Recent advances in our understanding of risk-sensitive foraging preferences **61**, 509, 2002, DOI: 10.1079/PNS2002181

Risk-sensitive foraging
Recent advances in our understanding of risk-sensitive foraging preferences **61**, 509, 2002, DOI: 10.1079/PNS2002181

Saliva
Salivary antioxidants and periodontal disease status
61, 137, 2002, DOI: 10.1079/PNS2001141

Saturated fatty acids
Effect of social variation on the Irish diet
61, 527, 2002, DOI: 10.1079/PNS2002191

Scientific studies
Nutritional quality of organic food: shades of grey or shades of green? **61**, 19, 2002, DOI: 10.1079/PNS2001126

Selenium
The argument for increasing selenium intake
61, 203, 2002, DOI: 10.1079/PNS2002153

Intracellular trafficking of micronutrients: from gene regulation to nutrient requirements
61, 405, 2002, DOI: 10.1079/PNS2002176

Sensitisation
Factors affecting the development of food allergy
61, 435, 2002, DOI: 10.1079/PNS2002184

Set-point
Does body mass play a role in the regulation of food intake?
61, 473, 2002, DOI: 10.1079/PNS2002194

Skeletal health
The role of the skeleton in acid–base homeostasis
61, 151, 2002, DOI: 10.1079/PNS2002159

Social class
Effect of social variation on the Irish diet
61, 527, 2002, DOI: 10.1079/PNS2002191

Socio-economic food disparities
Disparities in food habits across Europe
61, 553, 2002, DOI: 10.1079/PNS2002188

Stable isotopes
The paradox of improved antiretroviral therapy in HIV: potential for nutritional modulation?
61, 131, 2002, DOI: 10.1079/PNS2001139

States of change
Resistance to changes in diet
61, 267, 2002, DOI: 10.1079/PNS2002147

Supra-nutritional intakes
The argument for increasing selenium intake
61, 203, 2002, DOI: 10.1079/PNS2002153

Steroid hormone receptors
Steroid hormone receptors and dietary ligands: a selected review **61**, 105, 2002, DOI: 10.1079/PNS2001140

Structure-activity relationship
Evidence for consistent patterns between flavonoid structures and cellular activities
61, 97, 2002, DOI: 10.1079/PNS2001133

Survival outcome
Can supplements help meet the micronutrient needs of the developing world?
61, 223, 2002, DOI: 10.1079/PNS2002163

Sustainability
Food policies: a threat to health?
61, 579, 2002, DOI: 10.1079/PNS2002192

Thermal processing
Nutritional losses and gains during processing: future problems and issues **61**, 145, 2002, DOI: 10.1079/PNS2001142

Thermogenesis
Peri-operative amino acid administration and the metabolic response to surgery
61, 337, 2002, DOI: 10.1079/PNS2002175

Time trends
Effect of social variation on the Irish diet
61, 527, 2002, DOI: 10.1079/PNS2002191

Training and competition demands
The athlete's diet: nutritional goals and dietary strategies
61, 87, 2002, DOI: 10.1079/PNS2001132

Transcription factors
Effects of fatty acids on gene expression: role of peroxisome proliferator-activated receptor α, liver X receptor α and sterol regulatory element-binding protein-1c
61, 371, 2002, DOI: 10.1079/PNS2002169

Triacylglycerol
Changes in fat synthesis influenced by dietary macronutrient content **61**, 281, 2002, DOI: 10.1079/PNS2002148

Type 1 diabetes
1,25-Dihydroxycholecalciferol: endocrinology meets the immune system
61, 375, 2002, DOI: 10.1079/PNS2002170

Type 2 diabetes
Dietary fat: assessing the evidence in support of a moderate-fat diet; the benchmark based on lipoprotein metabolism
61, 287, 2002, DOI: 10.1079/PNS2002157

Healthy diet and lifestyle clustering and glucose intolerance
61, 543, 2002, DOI: 10.1079/PNS2002196

Ultrasound
Nutritional improvement of plant foods by non-thermal processing **61**, 311, 2002, DOI: 10.1079/PNS2002162

3′ Untranslated region
Intracellular trafficking of micronutrients: from gene regulation to nutrient requirements
61, 405, 2002, DOI: 10.1079/PNS2002176

Vitamin A
Fortification strategies to meet micronutrient needs: successes and failures **61**, 231, 2002, DOI: 10.1079/PNS2002150

Vitamin A as an anti-inflammatory agent
61, 397, 2002, DOI: 10.1079/PNS2002172

Vitamin A supplements
Can supplements help meet the micronutrient needs of the developing world?
61, 223, 2002, DOI: 10.1079/PNS2002163

Vitamin E
Nutrition interventions in aging and age-associated disease
61, 165, 2002, DOI: 10.1079/PNS2002144

Regulation of cell signalling by vitamin E
61, 415, 2002, DOI: 10.1079/PNS2002183

Vitamins
Antioxidant strategies for Alzheimer's disease
61, 191, 2002, DOI: 10.1079/PNS2002146

Waist circumference
Overweight, obesity and physical activity levels in Irish adults: evidence from the North/South Ireland Food Consumption Survey **61**, 3, 2002, DOI: 10.1079/PNS2001121

Weight control
Dietary fat: assessing the evidence in support of a moderate-fat diet; the benchmark based on lipoprotein metabolism
61, 287, 2002, DOI: 10.1079/PNS2002157

Weight loss
Low-fat diets and energy balance: how does the evidence stand in 2002? **61**, 299, 2002, DOI: 10.1079/PNS2002149

Weight monitoring clinic
An obesity clinic model
61, 9, 2002, DOI: 10.1079/PNS2001131

Zinc
Is there a potential therapeutic value of copper and zinc for osteoporosis? **61**, 181, 2002, DOI: 10.1079/PNS2002154
